SUMMARY

Business Intelligence Analyst – Supply Chain & Market Analytics with experience in pricing, cost, inventory, profitability, sales, and supply chain analysis. Skilled in SQL, Advanced Excel, Power BI, Tableau, and Snowflake to build pricing models, forecasts, automated reporting, and decision-ready analysis. Experienced partnering with Finance, Pricing, Operations, and Supply Chain teams to evaluate cost drivers, market trends, and business requirements that support accurate, profitable commercial decisions.

EDUCATION

Master of Science: Information Systems — **Aug 2021 – May 2023**
George Mason University (GMU) — GPA: 3.90

Bachelor of Engineering: Computer Science Engineering — **Aug 2017 – May 2021**
University of Mumbai (MU) — GPA: 3.39

SKILLS AND PROGRAMMING LANGUAGES

Market Analysis & Strategy: Pricing, Cost & Supply Chain Analytics: Pricing & Revenue Analysis; Cost Forecasting; Budget Variance Analysis; Inventory Analysis; Profitability Analysis; Product Demand Analysis; Market Trend Analysis; Competitive Analysis; Requirements Gathering

Data Analysis, BI & Visualization: Data Analysis & Interpretation; SQL (MySQL, SQL Server, Oracle); Tableau; Power BI, SSRS; Advanced Excel (PivotTables, Power Query, Macros, lookup formulas); KPI Development & Executive Dashboards; Variance Analysis & Trend Analysis; Forecasting Models (ARIMA, Regression, Time-Series Analysis) for Budgeting & Demand Planning

Data, Analytics & BI Tools: Python; R; Pandas; Google Analytics; Alteryx; Power BI Automation (scheduled PDF distribution, data refresh automation, report subscriptions, parameterized reports, SSRS integration)

AI & Intelligent Analytics Tools: Generative AI Tools (ChatGPT, Microsoft Copilot) for data analysis support, documentation, and insights summarization; AI-assisted Forecasting & Predictive Modeling; AI-driven Data Preparation & Analysis (feature engineering, pattern identification)

CRM, Project & Collaboration Tools: Salesforce; HubSpot; NetSuite; Jira; Confluence; Visio; SharePoint; MS Office Suite; Microsoft Teams; Slack

EXPERIENCE

Business Intelligence Analyst – Supply Chain & Market Analytics — May 2024 – Present
Dye Capital & Company — Remote, US

• Led end-to-end business intelligence initiatives across pricing, sales, inventory, and profitability, leveraging SQL, Power BI, and Advanced Excel to transform complex operational data into actionable insights, identifying opportunities to improve operational efficiency by 15% and support strategic business decisions.
• Designed, developed, and automated 20+ SQL reports, interactive Power BI dashboards, and advanced Excel models, integrating multiple data sources to streamline recurring reporting processes, reduce manual reporting efforts by 40%, and improve data accessibility and stakeholder decision-making.
• Conducted comprehensive pricing optimization, margin, pre/post, YoY, and variance analyses to evaluate revenue trends, product-level profitability, sales volume, and pricing effectiveness, identifying opportunities to increase revenue by 10% through data-driven pricing strategies and financial modeling.
• Built automated Power BI dashboards and KPI scorecards tracking sales, gross margins, inventory, customer behavior, and promotional performance, reducing reporting turnaround time by 30% while enabling real-time performance monitoring and faster identification of business trends.
• Developed customer segmentation, promotional effectiveness, loyalty, and retention analyses using SQL and Power BI to evaluate purchasing patterns, campaign performance, and customer engagement, identifying opportunities to improve marketing effectiveness and customer retention by 15%.
• Collaborated with Finance, Marketing, Supply Chain, and Operations to translate business requirements into scalable BI solutions, performing SQL-based data validation, cost reconciliation, root-cause analysis, and reporting automation to strengthen data accuracy, improve cross-functional alignment, and support profitability optimization.

IT Intern – Data Analyst — Jan 2024 – May 2024
Volkswagen Group of America — Chattanooga, TN

• Partnered with IT, Operations, and business stakeholders to gather requirements, analyze workflows, and translate operational needs into data-driven reporting solutions, improving process efficiency and cross-functional alignment by 20%.
• Developed KPI dashboards and automated recurring performance reports using Python and Advanced Excel to analyze system performance, resource utilization, and operational trends, reducing manual reporting efforts by 35% while improving data accuracy and decision-making.
• Conducted User Acceptance Testing (UAT), data reconciliation, system validation, and root-cause analysis to identify reporting discrepancies, troubleshoot technical issues, and improve system functionality, reducing recurring reporting errors by 20%.
• Supported IT infrastructure monitoring, system reliability, and security initiatives by analyzing performance metrics, implementing standardized monitoring protocols, and proactively identifying operational risks to maintain 65% system uptime.
• Collaborated with Agile development teams, IT stakeholders, and quick-response teams to prioritize incidents, optimize technical workflows, and improve issue resolution, contributing to a 15% reduction in system downtime and enhanced operational reliability.

Market Research Analyst — Sept 2023 – Jan 2024
Changing the Present — New York, NY

• Analyzed donor and financial data using Azure Databricks, identifying funding trends that contributed to a 10% increase in nonprofit donations.
• Developed donor segmentation and campaign performance analytics using Azure Synapse, Looker, and Snowflake, enabling data-driven targeting that supported 5% growth in philanthropic funding.
• Optimized HubSpot CRM workflows to strengthen data quality and fundraising–marketing alignment.
• Delivered decision-ready insights to redirect funding toward high-impact nonprofits, improving donor ROI.

PROJECTS & ACHIEVEMENTS

Forecasting & Profitability Project: Built forecasting and profitability analysis models using Snowflake, R, and Tableau on 6,000+ records, leveraging Snowsight Worksheets and Snowflake Notebooks for SQL/Python-based data preparation, validation, and analysis. Created Snowflake views and connected them to Tableau for visualization, identifying trends and profitability insights to support business planning and decision-making.
